

## **NCP Secure Enterprise Management System Named Finalist in *Info Security Products Guide's* 2010 Global Product Excellence Awards**

*Company Honored in Network Security Solution, IPSec/SSL VPN, and Managed Security Service Categories*

**Mountain View, CA—February 17, 2010—** [NCP engineering](#), today announced that *Info Security Products Guide*, the industry's leading publication on security-related products and technologies, has named the NCP Secure Enterprise Management System as a finalist in the 2010 Global Product Excellence Awards. The company has been honored in the Network Security Solution, IPSec/SSL VPN, and Managed Security Service categories. This recognition demonstrates that NCP is a key player in the security and IT industry, with advanced, ground-breaking products and solutions that are providing users with secure remote network access.

### **Key Facts:**

- The NCP Secure Enterprise Management System is a centrally-managed software solution that provides IT staff with a single point of administration for a company's entire remote access system, including IPSec/SSL VPN, firewall, certificate management, provisioning, and practical NAC functions.
- The flexible software solution makes remote access management simple by integrating to any third party hardware or software already in place, to optimize each connection, while maintaining strong policy enforcement and rule-set creation. A single administrator is able to easily configure and manage looks of remote users from one central station.
- For IT service companies or network administrators who oversee multiple networks across corporate divisions, the NCP Secure Enterprise Management System features improved activity log viewing and the extension of multi-company applications. All log messages are allocated to the relevant network administrator and are invisible to other companies, allowing for the easy and secure management of several independent networks.

### **Resources:**

- Complete technical specifications and features are available for the NCP Secure Enterprise Management System on the company's Web site at <http://tinyurl.com/dg6y2j>.

**About Info Security Products Guide Awards**

Info Security Products Guide sponsors leading conferences and expos worldwide and plays a vital role in keeping end-users informed of the choices they can make when it comes to protecting their digital resources. It is written expressly for those who are adamant on staying informed of security threats and the preventive measure they can take. You will discover a wealth of information in this guide including tomorrow's technology today, best deployment scenarios, people and technologies shaping info security and independent product evaluations that facilitate in making the most pertinent security decisions. The Info Security Products Guide Awards recognize and honor excellence in all areas of information security. To learn more, visit [www.infosecurityproductsguide.com](http://www.infosecurityproductsguide.com) and stay secured.

**About NCP engineering, Inc.**

The San Francisco Bay Area-headquartered NCP engineering, Inc., is an innovative software security provider that allows enterprises to rethink their remote access, and overcome the complexities of creating, managing and maintaining network access for staff. The company's products support enterprises with complex remote user needs, who want to leverage the latest end-devices to increase staff productivity, reduce network administration and adapt policy changes on-the-fly.

NCP engineering's technology covers all remote access needs, from IPsec / SSL VPN to endpoint firewalls and network access control (NAC) functions, as standalone solutions or as complementary additions to any third-party appliance or software.

The North American market is served through a network of national and regional technology, reseller, VAR and OEM channel partners, including WatchGuard and Astaro. NCP engineering's legacy began in 1986 with the creation of Nuremberg, Germany-based parent company, NCP engineering GmbH. For more, visit [www.ncp-e.com](http://www.ncp-e.com).
