

McAfee IntruShield Wins Information Security's Distinguished Gold Award for Intrusion Prevention

Information Security and SearchSecurity.com declare McAfee IntruShield the "2006 Product of the Year" in IPS with their Gold Award

Summary

- On February 1, 2006, InfoSec recognized McAfee IntruShield as the "2006 Product of the Year" in Intrusion Prevention, placing it ahead of both Cisco and ISS.
- IntruShield earned the distinguished Gold Medal Award for Intrusion Prevention with high scores in performance and security capabilities, as well as overall quality and feature-set.
- Information Security and SearchSecurity.com praised IntruShield for its deep packet inspection technology, multiple detection methods, virtual IPS and internal firewall, scalability, as well as its strong enterprise presence.

Notable Quotes from Information Security

- "IntruShield defends against known and unknown attacks, using three different means of detection. It also protects against clear-text and encrypted attacks."
- "The product is able to parse more than 100 protocols and more than 3,000 signatures to detect intrusions. It also includes virtual IPS and firewall deployment options."
- Online Review: http://searchsecurity.techtarget.com/tip/1,289483,sid14_gci1160466,00.html

McAfee IntruShield

- **Broad threat prevention**—protects infrastructure and endpoints from zero-day, DoS, and encrypted attacks, plus spyware, botnets, malware, VoIP vulnerabilities, phishing and worms
- **Risk-aware intrusion prevention**—prioritized blocking of the most relevant threats and attacks
- **Next-generation DoS prevention**— comprehensive, real-time protection against DoS attacks, cyber-attacks and SYN Floods
- **Backed by McAfee**—the worlds largest and most trusted name in the security industry
